Who Are We?

Ruby Homes is a third generation family owned and operated homebuilding company with current projects in Orange and Sullivan counties in New York.

The company has also previously built homes in Brooklyn and Staten Island in New York, and Carteret, New Jersey.

Ruby Homes is committed to excellence: building affordable, quality, high end housing.

Each home is built as if a family member will be living there, *because every home is a gem...*

The Design Build Concept *"Making your dreams come true"*

...from design to completion

In this unique system, we manage a team of professionals who work together from day one so you can have the perfect home for you.

The perfect home means different things for different people, which is why the design build concept is so successful. The needs of a young family can be very different from those of empty nesters.

- *Is this the home that you plan to live in for five years? Are you concerned about resale value?*
- *Or is this a home that you plan to live in for the next 30 or 40 years and will need a design that will see you through any life changes.*

These questions help us to create a home that is both beautiful and practical. The Architect and Builder work together from the beginning drawing on the architect's design expertise and the builder's "in the field" perspective to provide the most cost effective design for your money.

After the design phase is complete, we coordinate all of the contractors. Traditionally custom homes have many parties involved and coordination is the customer's responsibility. By having Ruby Homes oversee the entire project we are able to keep everything moving smoothly, allowing for greater efficiency and accountability.

Ultimately the design build process enables you to get the house you want, in the least amount of time, for the best price.

Build with confidence...

Build with the best...

Build with Ruby Homes

...because every home is a gem.
